Subject: Wilcox Oil Company Superfund Site
Date: Thursday, April 02, 2015 9:51:21 AM

Good Afternoon, I wanted to follow-up with you about the planned sampling of residential properties. On or near the Wilcox Site. Todd Downham and I met with residents on March 24/25, 2015, to talk about the Wilcox Oil Company Superfund Site and the interest each would have regarding sampling of their property. Below is a summary of interest/access and our plans for sampling. It should be noted that sampling is dependent on access. At this time, we continue to work on contacting a few residents for interest and access.

To summarize:

1. There are nine properties listed for sampling. 2 granted access (Chapman/Jones); 1 indicated it is in the mail (Thomas); 2 accepted copies with the expectation to review (White/Hinshaw); and 4 others have been contacted either by phone or email (Cheatwood/Childress/Mason/Tallent).
2. One additional property is listed as a possibility (Lee)
3. Grids will be determined based on the size of the property being sampled. The contractor will provide draft property grids for the team to review prior to sampling.
4. Sampling will be done in each grid for metals (sieved (only for 0-2in and 2-6in) and unsieved), SVOC, VOC, pesticides, and arochlor.
5. Sample depths will include 0-2in; 2-6in; 6-12in; and 12-24 in.
6. In areas of interest, deeper cores will be taken for visual logging. Tank area near Jones/Thomas; White's property, and potentially Lee's property.
